Accidents Can Happen Website

Please look at this website for keeping our children safe.

How can you help keep children safe?

- Keep all spare batteries in a sealed container out of children's reach and sight, ideally in a high-up, lockable cupboard.
- Keep products with batteries well out of reach if the battery compartment isn't secured.
- Put 'flat' or 'dead' batteries out of reach straight away and recycle them safely.
- Avoid toys from markets, discount stores or temporary shops as they may not conform to safety regulations, and take care when buying online or from overseas.
- Teach older children that button batteries are dangerous and not to play with them or give them to younger brothers and sisters.
