

Summer has arrived!

We have had a wonderful start to our final half term of the academic year. Thank you for your diligence in sending your child to school with a named sunhat and with sun cream applied.

A reminder that photographs are taking place next week on Tues 15th (Pre-school) and Weds 16th (Nursery) June. Thank goodness we can access the skills of hairdressers and barbers once more!

This newsletter is a bit of plea for your help and donations. We are collecting donations for our raffle at the family picnic on 14th July, and will be asking you to contribute items to our cake sale on the 15th July. This is part of our annual fundraising!

Thank you for your support.

Mrs Macdonald

Donations of Topsoil

We have some very talented members of staff! Two of the team designed and built a digging pit in our wild wood area during half term. This will enable the children to dig and explore what is in the mud, discover what happens when materials are mixed as well as independently access mud for our Mud Kitchen! Digging helps children to develop their muscles, which will help them to become confident writers. We now need to acquire some topsoil to finish this area. We would welcome any donations of bags of topsoil to help us provide such open ended opportunities. Can you help?

Wish List

We always welcome your support and contributions; there is much generosity in the Kingswood Community from which we are fortunate to benefit. Some parents have asked if we have any specific gift requests for the end of term. We would never expect to receive anything, however for those families who wish to do this we would like to guide your choices.

We are intending to adapt our environment so that it features more natural colours and textures. Research shows children benefit from learning in spaces that are free of distractions such as bright colours.

You may want to consider gifting a house plant, or even an artificial plant, or a wicker storage basket, to help us achieve our vision. We really would appreciate a variety of baskets and plants, which would enhance our learning spaces!
